

RELATED INSTRUCTION LIST

Related Instruction Purpose

The purpose of related instruction is to ensure minimum, essential skills in the areas of communication, computation, and human relations which align with and support program goals or outcomes. COCC includes related instruction requirements in every career and technical education program that is at least a year in length (36 credits or greater). Related instruction courses are embedded in the course list under program requirements. All courses used for related instruction have been approved as meeting the College's communication, computation, or human relations outcomes at the time of approval.
