# **BI 233: HUMAN ANATOMY AND PHYSIOLOGY III**

## **Transcript title**

Human Anatomy Physiology III

#### **Credits**

4

## **Grading mode**

Standard letter grades

#### **Total contact hours**

60

#### **Lecture hours**

30

#### Lab hours

30

## **Prerequisites**

BI 232.

# **Course Description**

Continuation of examination of the structure and function of the human body utilizing a systems approach. BI 233 emphasizes the anatomical and physiological relationships between the lymphatic/immune, respiratory, digestive, urinary, and reproductive systems. Concurrent labs include hands-on dissections of a variety of tissues, organs, fetal pigs and/or cats. For students in pre-nursing and other pre-professional health programs. This course includes animal dissection and cadaver observation.

## **Course learning outcomes**

- 1. Explain the structures and functions of normal body systems.
- 2. Use appropriate terminology to effectively communicate information related to anatomy and physiology.
- 3. Recognize and explain the interrelationships between and within physiological systems of the human body.
- 4. Approach and examine issues related to anatomy and physiology from an evidence-based perspective.
- 5. Access, evaluate, and use resources to stay current in emerging knowledge about the human body.
- 6. Make a connection between anatomy and physiology knowledge and practical applications.
