Course Description

Analyzes the social and cultural impact of media, including broadcast, print, film and digital communication. Examines careers in selected areas of media.

Course learning outcomes

1. Identify and explain major innovations in media and describe the impact of these innovations on world culture.
2. Evaluate the impact of advertising on the content of media.
3. Demonstrate knowledge of current copyright laws and fair use guidelines for their own media productions.
4. Identify and explain different business models used internationally to support and disseminate journalism.
5. Identify major figures in the history of media and their contributions to our use or understanding of communication.
6. Evaluate media content from a variety of perspectives, including perspectives that are sensitive to race, class, ability, age, nationality, gender-identity, or sexual orientation, etc.
7. Evaluate and fact-check news media.
