Description

Covers intervention in behavioral crises caused by crises of sudden death, suicide, rape, murder, vehicle accidents, disease, trauma, and child abuse. Includes resources, supporting behavioral patterns, and handling emotional stress of the patient as well as coping with emotional conflict within one's self.

Learning outcomes

1. Identify positive and negative approaches in order to provide safe and optimal care to patients perceived to be in crisis.
2. Identify personal coping strategies in order to avoid burnout.
3. Interact appropriately and professionally with individuals who have experienced or who are experiencing critical incidents.
