Course Description

Explore the developed world by comparing culture, politics, economics, history, urbanization, and the physical environment in this introductory geography course.

Course learning outcomes

1. Explain cultural variations across developed regions using spatial concepts.
2. Analyze how the five sectors of the economy have contributed to a developed region's level of development.
3. Identify the key historical factors which define a developed region's level of development.
4. Explain the characteristics, distribution, and migration of human populations among developed regions.
5. Evaluate land use patterns across developed regions and how they indicate a region's level of development.

Content outline

1. The United States
2. Canada
3. Europe
4. Japan
5. South Korea
6. Australia
7. New Zealand
