Course Description

Introduction to exercises that improve cardiovascular endurance, muscular strength and flexibility in a supportive team atmosphere. Utilizes interval training, core strength, plyometrics, running, games and weights and is appropriate for all levels of fitness and experience.

Course learning outcomes

1. Explain the relationship between human behavior and health.
2. Demonstrate skills development, safety practices, and fundamentals of Women's Bootcamp to develop overall physical fitness and enhance sport activities.
3. Develop SMART goals based on a personal vision of wellness which includes: physical activity, nutrition, and positive self-image.
4. Demonstrate safe and effective forms of cardiovascular, strength, and flexibility exercises necessary in order to improve overall physical fitness.
5. Articulate basic training principals and their application to achieving fitness goals.

Content outline

- Introduction to boot camp
- SMART goals and equipment demonstration
