Prerequisites

Instructor Approval.

Recommended preparation

BI 232.

Course Description

Provides intermediate skill development in correct code assignment based on the health record documentation and application of coding standards, guidelines and conventions for the Current Procedural Terminology, and the International Classification of Diseases Clinical Modification.

Course learning outcomes

1. Apply Current Procedural Terminology service guidelines, conventions, and compliant coding standards for coding and reporting of health care services.
2. Apply International Classification of Diseases Clinical Modification official guidelines, conventions, and standards for coding and reporting of the reason for health care services.
3. Abstract appropriate information from health record documentation and correctly code for healthcare procedures with Current Procedural Terminology codes.
4. Abstract appropriate information from health record documentation and correctly code for the reason the patient is receiving health care services using International Classification of Diseases Clinical Modification.
5. Analyze requirements for compliant coding.

Content outline

1. Format and structure of ICD-10-CM (International Classification of Diseases, 10th Revision, Clinical Modification)
2. ICD-10-CM indexes (Index to Diseases and Injuries, Neoplasm Table, Table of Drugs and Chemicals, External Causes Index)
3. ICD-10-CM official guidelines for coding and reporting

4. ICD-10-CM Tabular list
5. Format and structure of CPT (Current Procedural Terminology)
6. Indexing in CPT
7. CPT Appendixes and Modifiers
8. CPT service guidelines for coding and reporting
9. CPT Category I Sections (E/M, Anesthesia, Surgery, Radiology, Pathology and Laboratory, Medicine)

Required materials

Required textbook(s) and the current year CPT and ICD-10-CM codebooks. Computer and reliable internet access.
