Course Description

Provides an overview of the history, theory, and current research perspectives in the etiology, assessment, diagnosis and treatment of behavioral/process addictions. Specific attention paid to examining similarities and differences between chemical/substance addictions and behavioral/process addictions.

Course learning outcomes

1. Recognize the signs and symptoms of behavioral/process addictions in various contexts.
2. Identify and discuss key similarities and differences between substance addictions and behavioral/process addictions.
3. Describe screening, diagnosis, intervention and treatment processes.
4. Evaluate personal attitudes and beliefs related to working with process addictions.
