Lecture hours

70

Lab hours

60

Other hours

90

Prerequisites

department approval based on admission to the nursing program.

Description

Introduces fundamental concepts of nursing practice including nursing process, critical thinking, therapeutic communication, and cultural considerations. Students will have the opportunity to begin learning about patients with altered states of health. Students will become familiar with the major drug classifications and develop a working knowledge of pharmacological principles. The skills lab focuses on assessment and development of a core set of beginning level nursing skills. The clinical practicum provides students with the opportunity to apply knowledge and clinical skills to the adult patient with basic nursing care needs. First term of the practical nurse sequence and of the nursing program.

Learning outcomes

1. Nurse as Health Promoter and Care Provider: Apply assessment steps of the Nursing Process and meet fundamental care and comfort needs for one patient.
2. Nurse as Care Manager: Participate as a team member in the delivery of basic care.
3. Nurse as Professional Colleague: Incorporate behaviors of the professional nurse including ethical, legal and professional scope of practice, professional communication, collaboration, and career development.
4. Nurse as Quality Care Advocate: Participate in the delivery of evidence-based fundamental nursing care interventions.
5. Nurse as User of Technology and Informatics: Acquire skills for electronic documentation of patient assessment and fundamental skills.

Content outline

CONCEPTS:

Biophysical:
 Comfort
 Digestion
 Elimination
 Infection
 Intracranial Regulation
 Mobility
 Oxygenation
 Perfusion
 Sensory Perception
 Thermoregulation
 Tissue Integrity
 Psychosocial:
 Cognition
 Culture and Diversity
 Spirituality
 Trauma

Nursing Domain:

Assessment
 Communication
 Professional Behaviors
 Healthcare Domain:
 Accountability
 Advocacy
 Ethics

Evidence Base Practice

Legal Issues
 Safety
 Pharmacology
 Pain control, migraines, anesthesia
 Bowel and Bladder Disorders
 Respiratory Disorders

ISSUES:

Safe clinical environment, Professional boundaries, HIPAA, Mandatory Reporting/Duty to Report, Hand-off Reporting, Cultural Competence, Socialization into Nursing
 Conduct Derogatory to the Standards of Nursing

SKILLS:

1. Contribute to the Nursing Process.
2. Integrate a fundamental skill set in the performance of case-based lab activities and patient care.
3. Using assessment skills, collect patient data and recognize deviations from normal.
4. Utilize therapeutic techniques to communicate with patients and families.
5. Deliver organized patient care.
6. Utilize patient care standards in the delivery of care and teaching of patients.
7. Grow professionally through reflective practice.

Required materials

Required textbooks, computer software programs, clinic supplies, lab supplies, lab coat and nursing student uniform

Grading methods

The course grade is determined by the student's performance in the theory, assignments, clinical practicum, and lab practicum components of the course; all of these components must be passed to pass the course (see course syllabus for details).
