### **Course Description**

This is a wilderness first responder certification course designed to provide an individual with an in-depth knowledge of wilderness medicine and the basic skills to treat the most common injuries and illnesses encountered in the wilderness. This course is appropriate for those who spend a lot of time in remote locations (professionally or recreationally). The methods and protocols presented in this class follow the Wilderness Medical Society guidelines for minimum of 70-hour certification and are specific to a wilderness setting. The Wilderness Medical Society defines wilderness as a remote geographical location more than one hour from definitive care. Students are required to have a CPR- Adult, Child, Infant with AED certification in order to satisfy the WFR certification.

## **Course learning outcomes**

- 1. Evaluate the need for and appropriate method to transport a patient, including spinal immobilization.
- 2. Demonstrate appropriate documentation for emergencies in a wilderness setting.
- Classify wilderness settings and attribute the need for remote medical assessments and procedures.
- 4. Execute a thorough assessment of a patient's injuries and illnesses in remote settings.
- 5. Demonstrate effective procedures of treatment for a variety of injuries and illnesses in remote settings.
- 6. Organize an effective evacuation plan for a patient in a remote setting.

### **Content outline**

- 1. Defining wilderness medicine and legal terms
- 2. Evacuations and transporting patients
- 3. Patient Assessment System
- 4. Trauma: signs/symptoms and treatment
- 5. Illness: signs/symptoms and treatment
- 6. Environmental: signs/symptoms and treatment
