Prerequisites

PSY 262 and instructor approval based on completion of requirements outlined in PSY 261 and PSY 262.

Course Description

Provides the opportunity to summarize, reflect, and discuss experiences with international field study and field research techniques completed in PSY 262 in Indonesia. Includes formal and informal presentation styles; discusses oral, written and visual formats for scientific communication. P/NP grading.

Course learning outcomes

1. Utilize appropriate descriptive and inferential statistical techniques to answer their research question or hypothesis.
2. Explain their research to others in the field and to broader audiences using conventions of good scholarly communication.
3. Articulate the relevance of their research to their coursework and professional future, synthesizing their research, academic, and professional interests and goals.
4. Reflect constructively on their research experience in making decisions about their future.
5. Sustainability outcome: Explain the interconnectedness of environmental, social, and economic systems in the context of field research on conservation, biodiversity and global health
