TRANSFER PREPARATION

Students wishing to attend Central Oregon Community College and use credits earned toward a bachelor's degree have several options that range from completing individual courses to completing an associate degree designed for transfer.

Articulation Agreements

The College partners with several institutions to offer a seamless transfer for specific majors in the form of an articulation agreement. Agreements identify degree requirement equivalencies between two institutions and often provide alignment beyond general transfer tables. Articulation agreements apply to a specific time frame; please see Articulation and Partnership Agreement for a current list.

Associate of Arts Oregon Transfer (AAOT)

The Associate of Arts Oregon Transfer (AAOT) degree conforms to the state of Oregon guidelines and therefore allows students to transfer to an Oregon public university having met all lower-division general education requirements. With appropriate planning, all lower-division major requirements may also be met. Students should work closely with an advisor to select the best degree option and to review specific transfer requirements.

In addition to Oregon's public universities, institutions accepting the AAOT include George Fox College, Linfield College, Marylhurst College, Pacific University, University of Portland, Warner Pacific College, Willamette University, Evergreen State College, Pacific Lutheran University, and Washington State University.

The AAOT is not associated with a major and is awarded as Associate of Arts/Oregon Transfer. However, the College provides focus areas (e.g., psychology, geology) within the degree that help students select courses aligned with their major (indicated as "recommended" on the course list and sample plan) and the transfer institution's degree requirements.

Advantages

• Fulfills the lower-division (freshman/sophomore) general education requirements for baccalaureate degrees at all Oregon public universities.
• Allows student to transfer with junior standing for registration purposes.

Considerations

• No formal agreements exist for this degree to meet general education requirements at out-of-state colleges, although courses for the AAOT parallel many of them.
• Students transferring to an Oregon public university should review any world language and specialty course requirements of the transfer institution.
• The AAOT does not guarantee that two additional years will suffice to earn a baccalaureate degree nor give students junior standing in their majors. Students must still meet their transfer institution's admission requirements.
• Students may transfer before completing the AAOT. However, students risk losing credits that are usually accepted within the degree, or they may fall short of the transfer institution's general education requirements.

Requirements

Required Courses

• 90 to 108 credits
• Course requirements align with state standard
• General education courses (foundational skills and discipline studies) must be a minimum of three credits (except health)
• Courses may only count in one requirement (except cultural literacy)
• Limit of 12 career and technical education credits
• See individual AAOT focus areas for recommendations for specific bachelor degree majors
• See Exploratory AAOT or Undeclared Transfer Major AAOT for a list of AAOT general requirements

Performance Standards

• Students must have a minimum cumulative GPA of 2.0.
• All courses must be completed with a C grade or higher. Transfer programs may have a higher grade requirement.

Associate of Arts Transfer (AAT)

Pending approval by the Northwest Commission on Colleges and Universities (NWCCU).

Like the Associate of Science Transfer, a student who completes AAT will have met lower-division major and general education requirements of baccalaureate degree programs for transfer to a public university in Oregon and have junior standing in a specific major or have equivalent status to students who started at a public university in the same major.

Courses of study leading to a major in the humanities, social sciences, or arts will generally be embedded in the AAT.

Please note that class standing or grade point average requirements for specific majors, department, or schools are not necessarily satisfied by an AAT. Students should always work with their academic advisor and check with the receiving institutions to ensure they have the most current transfer and degree information.

Advantages

• Students can meet all or most general education and major requirements to transfer an Oregon public university with junior standing in the major if appropriate courses are chosen.
• The classes, outcomes, and completion standards for the major-specific elements within AAT are defined at the state level. In majors where junior standing within 90 credits is not possible, students who complete an AAT will have status equivalent to students who started at a public university in the same major.
• The AAT includes at least eight courses (minimum 30 credits) of embedded coursework, called the core transfer map, which will apply to at least 30 credits of general education requirements for a bachelor’s degree at any Oregon public university.

Considerations

• A student is encouraged to work with an advisor in the selection of courses in order to meet the degree requirements of the baccalaureate institution to which the student plans to transfer.
• All course, class standing, or grade point average requirements for specific majors, departments, or schools are not necessarily satisfied by an AAT.

**Requirements**

**Required Courses**

- 90-108 credits
- Course requirements align with state standard
- General education courses (foundational skills and discipline studies) must be a minimum of three credits
- Courses may only count in one requirement (except cultural literacy)
- Limit of 12 career and technical education credits

**Performance Standards**

- Students must have a minimum cumulative GPA of 2.0.
- All courses must be completed with a C grade or higher. Transfer programs may have a higher grade requirement.

**Associate of Science Oregon Transfer (ASOT)**

Like the AAOT, a student who completes the ASOT will have met the lower division general education requirements of baccalaureate degree programs of any Oregon public university. Unlike the AAOT, the ASOT includes courses that institutional representatives recommend as preparation for specific majors.

Please note that the degree does not guarantee completion of lower division major requirements for the major and that course, class standing, and grade point average requirements for specific majors are not necessarily satisfied. Students should always check with the receiving institutions to ensure they have the most current transfer and degree information.

The College currently offers ASOT degrees in Business and Computer Science.

**Advantages**

- Students can meet all or most general education and/or major requirements for a specific transfer institutions if appropriate courses are chosen.

**Considerations**

The ASOT degree:

- can limit a student’s flexibility in choosing both the major and the transfer institution,
- does not ensure junior standing at Oregon public universities,
- does not guarantee that a student will meet all lower-division general education and major requirements.

**Requirements**

**Required Courses**

- 90-108 credits
- Course requirements align with state standard
- General education courses (foundational skills and discipline studies) must be a minimum of three credits (except health)
- Courses may only count in one requirement (except cultural literacy)
- Limit of 12 career and technical education credits
- See individual programs for specific requirements aligned with a bachelor’s degree major

**Performance Standards**

- Students must have a minimum cumulative GPA of 2.0.
- All courses must be completed with a C grade or higher. Transfer programs may have a higher grade requirement.

**Associate of Science Transfer (AST)**

Like the AAT, a student who completes the AST will have met lower-division major and general education requirements of baccalaureate degree programs for transfer to an Oregon public university with junior
Standing in a specific major or have status equivalent to students who started at a public university in the same major.

Courses of study leading to a major in a science, technology, engineering, mathematics (STEM) discipline will generally be embedded in the AST.

Please note that class standing or grade point average requirements for specific majors, department, or schools are not necessarily satisfied by an AST. Students should always work with their academic advisor and check with the receiving institutions to ensure they have the most current transfer and degree information.

**Advantages**

- Students can meet all or most general education and major requirements to transfer an Oregon public university with junior standing in the major if appropriate courses are chosen.
- The classes, outcomes, and completion standards for the major-specific elements within AST are defined by the state. In majors where junior standing within 90 credits is not possible, students who complete an AST will have status equivalent to students who started at a public university in the same major.
- The AST includes at least eight courses (minimum 30 credits) of embedded coursework, called the core transfer map, which will apply to at least 30 credits of general education requirements for a bachelor’s degree at any Oregon public university.

**Considerations**

- A student is encouraged to work with an advisor in the selection of courses in order to meet the degree requirements of the baccalaureate institution to which the student plans to transfer.
- All course, class standing, or GPA requirements for specific majors, departments, or schools are not necessarily satisfied by an AST.

**Requirements**

**Required Courses**

- 90-108 credits
- Course requirements align with state standard
- General education courses (foundational skills and discipline studies) must be a minimum of three credits
- Courses may only count in one requirement (except cultural literacy)
- Limit of 12 career and technical education credits

**Performance Standards**

- Students must have a minimum cumulative GPA of 2.0.
- All courses must be completed with a C grade or higher.

**Oregon Transfer Module (OTM)**

The OTM is designed for students who plan to transfer to an Oregon community college or public university. Composed of 45 credits in writing, math, communication, social sciences, sciences, arts and letters, and electives, it is similar to many institutions’ first-year requirements.

**Advantages**

- Completion guarantees that Oregon community colleges and public universities will accept all credits toward the institution's general education requirements, and depending on courses chosen, may meet some lower-division major requirements.
- Provides students with documentation of completion of a standard set of commonly accepted courses.

**Considerations**

- Depending on the institution, students may be required to take additional general education courses.
- Students transferring to an Oregon public university should review any world language and specialty course requirements of the transfer institution.
- The OTM is not designed to be an endpoint; it is a tool toward degree completion. The OTM is not a degree or certificate but can be
noted on a transcript to confirm completion of a subset of general education courses common among Oregon’s community colleges and public universities.

**Performance Standards**
- All courses must be completed with a C or higher and be worth a minimum of three credits.
- Students must have a minimum cumulative GPA of 2.0.
